SKILLS

Leadership
Teamwork
Project management
Team Building and training
Professional Centric

TECHNICAL SKILLS

Cartography
Database Management
Engineering Survey
GIS programming
AutoCAD Civil 3D
Drone Deploy
Drone Training

TRAINING

Remote Pilot License

Drone Instructor

EDUCATION

Diploma in Cartography and GIS-Regional Centre for Mapping of Resources for Development 2023-2024

Certificate in Land Survey - Regional Centre for Mapping of Resources for Development 2020-2021

Kenya Certificate Secondary Education-Maiani Boys High School 2015-2018

Kenya Certificate in Primary Education-Enkirgirri Primary School 2004-2014

WORK EXPERIENCE

Geoid Technologies Limited
Drone Pilot / Instructor/
Land Surveyor
November 2021 -
Duties and Responsibilities:

Leading and executing mapping operations i.e. Aerial Mapping and Topographical mapping
Acquire, download, correct, integrate and document GPS data from the field to existing GIS datasets.

Geo angular Surveyors
Land Surveyor

Duties and Responsibilities:

Topographical surveys
Land Subdivisions

PROJECTS

Konza Drone Mapping Project
Drone Pilot in charge.

The project involved aerial mapping of 5000 acres of Konza Technopolis to come up with a basemap to be used for planning

Zipline Aerial Mapping Project
Surveyor and Drone Pilot In charge

Operated and assured proper maintenance of full range GNSS Equipment
Picking of Ground Control Points (GCPs)
Aerial mapping of 440acres around 107 health facilities,

Thiba Dam and Thiba River Drone Mapping
Surveyor and Drone Pilot

Operated and assured proper maintenance of full range GNSS Equipment

Establishment of benchmarks and picking of Ground Control Points (GCPs)
Picking of spot heights and feature data using GNSS RTK instrument.
Aerial mapping of 800 acres of Thiba Dam and 80km of Thiba River.

KIPETO Windfarm Turbines Inspection

Inspecting blades
Manual control of the UAV
Mapping 30 turbines each with 3 blades

Kenya Informal Settlement Improvement Project (KISIP) Phase 1
Surveyor and Drone Pilot

Searching of Old control points
Carrying out Static survey for extension of controls
Picking Ground Control Points (GCPs)
Aerial mapping of the settlements

Cadastral and Engineering

Picking and plotting using GNSS and AutoCad

Setting out of buildings

Agricultural Drones Experience

Spraying fertilizers on farms using drones and also seeds broadcasting

Drone Training

Training clients to operate drones and rules governing unmanned aviation
